

Free Initial Scan Session

The Free Initial Scan Session is a systematic screening of your marketing strategy, tactics and execution/operations.

The Free Initial Scan Session consists of a quick briefing session, and one or two working sessions. The briefing session usually ends up with some homework for our clients, meaning that working sessions take place after one or two weeks.

Based on the working sessions, Straight Forward provides a project proposal, including a remuneration quotation.

Yes, I am interested, call me for an appointment.
